Art Unit: 1616

Regarding applicants' argument filed 12/16/04 regarding the primary reference filed 12/16/04, the election of species requirement filed 11/19/03 over the "lipid or surfactant" the examiner had regrettably inadvertently omitted the statement that the election of species requirement filed 11/19/03 over "lipid or surfactant" had been withdrawn, rendering applicants' argument comparing pluronics to the non-polar phase of the reference's emulsion moot. Applicants' arguments regarding the secondary references will be addressed upon applicants' response to the following:

Applicants' amendment filed 12/16/04 engenders a further election of species requirement:

Claim 2 is generic to a plurality of disclosed patentably distinct species comprising structured fluids. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
